

# FRAMER CERTIFICATE

## PROGRAM DESCRIPTION

Manitoba Home Builder's Association approached Manitoba Construction Sector Council to develop a part time framer course that would address skill gaps in the homebuilding industry. Many apprentices do not acquire all the skills required to frame a house until level three of the program.

This program focuses specifically on framing a house. It is designed for the entry level construction worker who wants a specific skill set to find or keep employment. The framers course will teach technical skills (knowledge of tools, equipment and processes) and will embed safety training and Essential Skills throughout the program (reading, measurement, document use, communication, physical dexterity, working from heights, working with others).

## MODULES

- Identify components and apply information from blueprint drawings.
- Identify and follow processes and procedures for framing.
- Identify and use tools and equipment to frame a house.
- Demonstrate an awareness of standards of best practice.
- Identify products and select appropriate materials to use for framing.
- Identify Processes and follow procedures for wall and roof framing.
- Identify and use appropriate measurement and numerical calculations to frame a house.
- Explain energy efficient practices used in homebuilding.

## HOW TO REGISTER

Contact the Manitoba Construction Sector Council at [info@mbcsc.com](mailto:info@mbcsc.com), or apply on line at: [mitt.ca/homeframing](http://mitt.ca/homeframing)
