# MOULD & ASBESTOS IN CONSTRUCTION CERTIFICATE

---

## DESCRIPTION

The Manitoba Construction Sector Council collaborated with industry partners to create a Mould and Asbestos Removal/Remediation course that will address specific training gaps in the homebuilding industry throughout Manitoba. This course has been designed as a stand-alone course for entry level construction workers and alternatively, as a condensed add-on course for graduates of the MCSC Finisher course.

The Mould and Asbestos Removal/Remediation course combines classroom and practical learning activities. It will teach technical skills (knowledge of tools, equipment and processes) and will embed safety training and Essential Skills throughout the program (reading, measurement document use, communication, physical dexterity, working with others).

**Career opportunities** can be found in the construction industry.

## 2 MODULES

### Module 1: Asbestos

- Safety/PPE
- Tools/equipment
- Moisture control
- Home Inspection Basics
- Asbestos Removal and Remediation
- Drywall repair
- Practical applications

### Module 2: Mould Removal, Remediation & Prevention

- Safety
- Drywall repair
